

PIKMIN NEUE

Pikmin Neue is an OpenType font based on Pikmin's new logo redesign. It has been kerned and balanced reasonably well, and is suited for headers and short strings of type. Being an all-caps typeface, it's not ideal for body text.

Whenever possible, glyphs have been recreated from official logos. Glyphs that have never been used publicly have been created based on the strokes and curves of the official ones.

The typeface is identical in upper and lower case, except when it comes to O and P. The capital versions of these letters have floral decorations matching those in the main Pikmin logo and the Pikmin Bloom logo.

Pikmin Neue is free to use in any context, and no credit is necessary.
